Lab Test Instructions

For a fasting blood sugar test, you must fast for 8 to 10 hours before the test. Do not eat any food during this period. You are allowed to drink plain water while fasting, but avoid tea, coffee, juice, or

any sugary drinks. For a lipid profile (cholesterol) test, fasting of 9 to 12 hours is required. Blood samples are collected at the clinic laboratory between 7:00 AM and 11:00 AM, Monday to Saturday. No appointment is needed for routine lab tests.

Collecting Your Reports

Most lab reports are ready within 24 hours. Reports can be collected from the clinic reception, or downloaded from the HealthFirst website using the reference number printed on your receipt. Reports are also sent to your registered email address.

Medicine Refill Policy

Repeat prescriptions and medicine refills are provided only for patients who have consulted a HealthFirst doctor within the last 3 months. To request a refill, contact the reception with your prescription details at least 2 days in advance. Refills for certain medicines may require a short review consultation with the doctor. The clinic does not dispense any medicine without a valid prescription.

Home Visits

HealthFirst Clinic currently provides consultations only at the clinic and through online video calls. Home visits by doctors are not available at this time.

Medical Emergencies

HealthFirst Clinic is not an emergency facility. In case of a medical emergency such as chest pain, difficulty breathing, severe bleeding, or loss of consciousness, please call the national emergency number 112 (or ambulance 108) immediately, or go to the nearest hospital emergency room. Do not wait for a clinic appointment during an emergency.
